

JU CLIMATE INNOVATION CHALLENGE (CIC)

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion (United Nations, 1994).

It is important to note that the majority of the world's population is concentrated in the developing countries. In 1990, 80% of the world's population lived in developing countries, and this percentage is expected to increase to 85% by the year 2000 (United Nations, 1994).

The rapid increase in the number of people in the world is a result of the high birth rate and the low death rate in the developing countries.

The high birth rate in the developing countries is a result of the high fertility rate and the high infant mortality rate.

The high infant mortality rate in the developing countries is a result of the lack of access to health care and the lack of education.

The lack of access to health care in the developing countries is a result of the lack of resources and the lack of infrastructure.

The lack of education in the developing countries is a result of the lack of resources and the lack of infrastructure.

The lack of resources in the developing countries is a result of the lack of investment and the lack of infrastructure.

The lack of infrastructure in the developing countries is a result of the lack of investment and the lack of infrastructure.

The lack of investment in the developing countries is a result of the lack of resources and the lack of infrastructure.

The lack of infrastructure in the developing countries is a result of the lack of investment and the lack of infrastructure.

The lack of investment in the developing countries is a result of the lack of resources and the lack of infrastructure.

The lack of resources in the developing countries is a result of the lack of investment and the lack of infrastructure.

The lack of infrastructure in the developing countries is a result of the lack of investment and the lack of infrastructure.

The lack of investment in the developing countries is a result of the lack of resources and the lack of infrastructure.

The lack of resources in the developing countries is a result of the lack of investment and the lack of infrastructure.

The lack of infrastructure in the developing countries is a result of the lack of investment and the lack of infrastructure.

The lack of investment in the developing countries is a result of the lack of resources and the lack of infrastructure.

The lack of resources in the developing countries is a result of the lack of investment and the lack of infrastructure.

The lack of infrastructure in the developing countries is a result of the lack of investment and the lack of infrastructure.

The lack of investment in the developing countries is a result of the lack of resources and the lack of infrastructure.

The lack of resources in the developing countries is a result of the lack of investment and the lack of infrastructure.

The lack of infrastructure in the developing countries is a result of the lack of investment and the lack of infrastructure.

The lack of investment in the developing countries is a result of the lack of resources and the lack of infrastructure.

The lack of resources in the developing countries is a result of the lack of investment and the lack of infrastructure.

The lack of infrastructure in the developing countries is a result of the lack of investment and the lack of infrastructure.
